Pooja Gautam

Full-Stack Developer | ASP.NET Core & Node.js

gautam2.pooja@gmail.com · Kathmandu, Nepal · github.com/merosansar · linkedin.com/in/poojagautam52

PROFESSIONAL SUMMARY

Full-stack developer based in Kathmandu, Nepal, building and maintaining scalable web applications on two stacks: ASP.NET Core with C# and Node.js with Nest.js, delivered through React.js and Next.js frontends. Designs relational and NoSQL data models in SQL Server, PostgreSQL and MongoDB, builds RESTful APIs and microservices, and ships containerised applications to Microsoft Azure. Takes ownership of features from database design to production release, with a focus on clean, maintainable and reliable code.

TECHNICAL SKILLS

Backend	ASP.NET Core, ASP.NET MVC, C#, Entity Framework, Node.js, Nest.js, microservices (ASP.NET Core and Nest.js), REST APIs
Frontend	React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, shadcn/ui
Databases	SQL Server, PostgreSQL, MongoDB: schema design, stored procedures, query optimisation
Cloud & DevOps	Microsoft Azure, Docker, Git, GitHub, GitLab, code reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer (ASP.NET & Node.js) — Oct 2024 – Present
Smart Solutions Technology Pvt. Ltd. · Kamaladi, Kathmandu

- Work on microservices projects built with ASP.NET Core and Nest.js.
- Design, build and maintain web applications across ASP.NET Core and Node.js (Nest.js) backends with React.js and Next.js frontends, from database design through to release.

Dotnet Developer — Jul 2023 – Oct 2024
CreationSoft Nepal Pvt. Ltd. · Kathmandu, Nepal

- Worked on the remittance project, responsible for designing, developing and maintaining a secure and efficient financial transaction system.
- Developed and optimised remittance processing modules using ASP.NET MVC (.NET Framework 4.8) and SQL Server 2016.
- Designed and implemented stored procedures, functions and database schemas to handle large-scale financial transactions.
- Created detailed financial and transaction reports, improving operational transparency and compliance.
- Integrated third-party APIs for payment processing, ensuring seamless fund transfers.
- Implemented role-based authentication and authorisation for secure access control.
- Improved system performance by optimising database queries and application efficiency.
- Collaborated with cross-functional teams to meet regulatory and business requirements.

Software Engineer — Nov 2016 – Nov 2018
Gapsco Pvt. Ltd. · Gairidhara, Kathmandu

Technologies: ASP.NET MVC, Entity Framework

Software Developer — Apr 2016 – Nov 2016
IMS Himalayan Sangrila Pvt. Ltd. (now IMS Software Pvt. Ltd.) · Kathmandu, Nepal

Technologies: ASP.NET, MongoDB

Intern — Feb 2015 – May 2015
Tulips Technologies

SELECTED PROJECTS

Hisab – Multi-tenant invoicing and cash-flow app for small businesses in Nepal Live · Frontend · Backend

- Built a Nest.js and PostgreSQL API where every table is scoped to a workspace, with owner, admin, member and viewer roles and JWT sign-in using rotating refresh tokens in httpOnly cookies.
- Invoices with 13% VAT, partial payments, expenses and a dashboard of receivables; money is calculated in integer paisa, with gap-free invoice numbers and optimistic concurrency.
- React 19 and TypeScript frontend (Tailwind CSS, shadcn/ui, TanStack Query, Recharts): invoice editor with live VAT totals, receivables aging, light and dark themes and phone-friendly layouts.
- Covered by Vitest unit and end-to-end tests against PostgreSQL, documented with Swagger, and packaged with Docker Compose.

Stack: Nest.js, React.js, TypeScript, PostgreSQL, Tailwind CSS, shadcn/ui, Docker

Guff – Real-time team chat with channels, direct messages and file sharing Live · Frontend · Backend

- Socket.IO layer for live messages, typing, read receipts and presence, with per-user and per-channel rooms.
- Reliable delivery: client-ID idempotency prevents duplicate messages after a dropped connection, and offline messages wait in an outbox until reconnect.
- Security: hashed rotating refresh tokens, zod validation on every request and socket event, and GridFS uploads behind expiring signed links; private channels return 404 to outsiders.
- React 19 and TypeScript frontend (Tailwind CSS, shadcn/ui, TanStack Query): unread counts, mentions with autocomplete, Ctrl+K search, light and dark themes and a phone layout.
- Backed by 74 automated tests against MongoDB and packaged with Docker Compose.

Stack: Node.js, Express, React.js, TypeScript, MongoDB, Socket.IO, Tailwind CSS, Docker

EDUCATION

BSc CSIT – Bachelor of Science in Computer Science and Information Technology
Tribhuvan University (TU)
